Educational institutions around the world have launched pilot e-Learning programs by implementing the **Blackboard Learning System—Basic Edition™**.

Intuitive and easy-to-use, this product has powerful capabilities in three key areas: Instruction, Communication and Assessment. Diverse institutions have discovered the power of e-Learning by using this application to:

- Create powerful learning content using a variety of Web-based tools
- Facilitate student participation, communication and collaboration
- Evaluate students’ work using a rich set of assessment capabilities
- Bring top publisher content into e-Learning

After experiencing the value of the Blackboard Learning System—Basic Edition, many institutions move to the Blackboard Learning System, a world-class enterprise application. The Blackboard Learning System provides tremendous functionality, including enterprise scalability, multi-language support, and system integration capabilities.
