

## **CSP Basic is a 30 question test that includes the following computer skill sets:**

- **File Management**
- **Word Processing**
- **Internet and Email**

## **Benefits of the CSP BASIC are:**

- Pinpoints each student's proficiencies and deficiencies within the three basic skill sets
- Results provide faculty, staff, and administrators with essential information needed for both proper academic advising and accurate course selection
- Outcomes allow students to be assigned to classes which optimize their opportunity for success.
- Increased student success and retention
- Developed with input from higher education faculty, test development experts, and actual marketplace experience

## **Key features of CSP:**

- The CSP assessment is a mix of multiple choice and performance-based questions
- Questions quickly and efficiently test a student's basic knowledge of the three basic competency areas necessary for success in today's digital world
- Faculty and staff are empowered to determine the cut score for passing each competency area.
- The CSP assessment is administered via a secure internet connection with minimal setup and system requirements
- Students take the assessment using campus computers in a secure, proctored environment
- Multiple test/retest question streams
