

COLLEGE CREDIT

In an effort to maintain the affordable course cost associated with the delivery of the NPS-SLET program, SCC-PSTC offers the program through the Career Technologies (Continuing Education) Division. As a result, all enrollees (Recruits) pay the same Registration Fee, regardless of their State of residency, and without additional fees for out-of-state tuition. Therefore, Continuing Education Units (CEUs) are awarded only at the successful completion of the Training Session. Regular college credit is not earned. However, Consortium Agreements have been established with some institutions, which enables graduates of the NPS-SLET program to receive credit at their home university/college. If you would like to establish a Consortium Agreement with your university/college, you will need to discuss this option with that institution (usually, an Advisor, or Admissions Officer) and provide us with a contact name and telephone number.
