SOUTHWESTERN COMMUNITY COLLEGE	INFORMATION TECHNOLOGY **AUDIT LOG MANAGEMENT**	Policy 8.23

I. POLICY STATEMENT

For Southwestern Community College ("College") it is important for an enterprise to develop a log management process. At a minimum, this process should include procedures for enabling the appropriate logs on enterprise assets, collecting these logs for future analysis, and ensuring sufficient space to store the logs is available within the enterprise This document supports the development of those processes in accordance with the CIS Controls.

Many types of audit logs exist. Here are a few examples:

- Operating system log files
- Antivirus, antimalware, or host-based intrusion detection logs
- Application logs
- Firewall logs
- Webserver logs
- Physical access control logs
- Access control logs for sensitive data

II. PROCEDURES

See SCC Procedure 8.23.01 (AUDIT LOG MANAGEMENT).

Adopted: September 2025
